

Hard work rewarded

Village youngsters were disappointed when their old wooden fort play area was banned on health and safety grounds. A group of village volunteers started the "Play East Haddon Project" and after much hard work, together with the assistance of Miracle Design and Play Limited, their new exciting play area was opened on the 17th October last year.

Raw to the Core

Sports turf contractor specialists Agripower recently chipped off the ice and broke new ground with a UK debut. The re-surfacing of the Raw Soccer centre at Lowestoft, Suffolk consisted of the

removal of an existing 40 x 20m sand filled surface and re-laying with the latest product from leading synthetic manufacturer Lano.

The new MXSi 60 product has the highest face weight of

any product currently on the market and was best suited to the highly intensive use at the centre.
